

Never compromise on quality!

Geo-Fix[®]

Brand leading brush-in jointing compound

Celebrating 25 Years

When Geo-Fix Original was first brought to market 25 years ago, the paving industry was a completely different landscape compared to today. With traditional cementitious jointing products causing huge problems for Local Authorities and contractors, it soon became clear that an alternative solution was required.

After consulting and listening to the needs of the entire paving industry, Geo-Fix[®] developed a new technology using sand polymers to create Geo-Fix[®] Original brush-in jointing compound – a truly original product that revolutionised traditional jointing methods. Offered in 2 colours in grey and buff and comes in a 20Kg tub.

Creating a new product is one thing, but Geo-Fix[®] knew how important it was to carry out extensive testing with the contractors who would be using the product to guarantee it was suitable and performed perfectly – and that is exactly what they did.

Development

This extensive research, development and testing that took place 25 years ago has resulted in products that have maintained their integrity and are proven to stand the test of time.

During their 25-year history, Geo-Fix[®] have established a significant distribution network of independent builders merchants, up and down the country.

In 2013, they enhanced their product offering to include Geo-Fix[®] All Weather jointing compound, a superior brush-in sand that can be used in all weathers, and now offer a selection of beautiful coloured sands to complement all designs and tastes. All Weather is supplied in 14Kg tubs and is available in stone, anthracite, graphice, mid grey and slate grey.

Professionals In Partnership

In 2022, Geo-Fix[®] have partnered with Bond It, a British manufacturer with 20 years' experience manufacturing and servicing the construction industry, to become their nominated distribution supplier.

Geo-Fix[®] jointing compounds are recognised brand leaders and will be a perfect fit alongside Bond Its extensive Drive Alive range of products. This is a huge opportunity for Bond It to expand into new markets.

Geo-Fix[®] Original and All Weather is now sold in over 20 countries including Europe and Australia.

Ready mixed paving jointing compounds that can simply be brushed into joints with minimal effort. Geo-Fix® is easily finished by compacting with a pointing tool saving valuable time compared to traditional wet pointing.

It also means less materials to carry on to jobs so major space saving benefits.

Proven Results

Geo-Fix® Original paving jointing sand has had its performance capabilities thoroughly tested at an independent UKAS testing laboratory and is proven to be up to 50% stronger than competitor products.

The Lucideon UKAS testing laboratory 0013 used British Standard 6319 – Part 2: 1990 to test and verify the compressive strength and tensile strength of Geo-Fix® Original and Geo-Fix® were delighted to see that it outperformed two competitor products in both wet and dry applications.

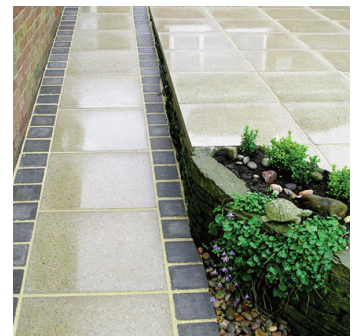

Geo-Fix® has been trusted by professionals for over 25 years. Geo-Fix® Original offers huge time saving

benefits and unlike mortar joints, it is totally resistant to freeze-thaw cycles and will not crack or pop out with frost.

Geo-Fix® jointing compounds are proven to offer a permanent, durable and weed resistant solution that is suitable for all paving projects.

Successfully used on numerous installations including Chelsea Gardens, Bank Of Audi, Bank Of Beirut, Hulme Park Manchester, Jerwood Space Art Gallery, to name but a few. It is a tried and tested product.

Choose Geo-Fix® for a professional finish in the minimum time.
