

# uPVC Sacrificial Screed Rail System

## K-FORM Screed Rails

K-FORM UPVC Screed Railing provides the construction industry with an economical, efficient and environmentally friendly alternative to steel and timber formwork.

Made from 100% recycled materials, K-FORM is lightweight, durable and does not require removal after placement of concrete. It is easily cut to length on site and has pre-drilled holes in the vertical face for placing steel dowels bars and in the base for anchoring. K-FORM's patented design features a removable top strip for joint sealing and its unique end clips allow for quick and easy installation.

Intended to be used with all types of screeds including; twin beams, roller strikes, vibro strikes, etc. K-FORM's K135, K85 and K35 sacrificial railing replaces steel forms where joints are needed.

## Features & Specifications of K-FORM Screed Rails

- ✓ Enables adjoining bays to be poured simultaneously
- ✓ 'Click-together' ease
- ✓ Pre-drilled holes for dowel bars
- ✓ Pre-drilled holes in base for anchoring
- ✓ Manufactured in durable 100% recycled uPVC
- ✓ Removable top strip to allow joint sealing
- ✓ No removal after use
- ✓ Designed for pours of 50mm-225mm thick.

Working in partnership with

We stock the following products:

**K-FORM K135 Screed Rail**  
for Slab thickness 150mm - 225mm

**K-FORM Screed Rail**  
Top Strip Angle Joint

**K-FORM K85 Screed Rail**  
for Slab thickness 100mm - 140mm

**K-FORM Screed Rail**  
25mm Extension Strip

For more information please see overleaf

## Cross Section of K-FORM

## K-FORM K85 Screed Rail

for Slab thickness 100mm - 140mm

## K-FORM K135 Screed Rail

for Slab thickness 150mm - 225mm

## K-FORM Screed Rail

25mm Extension Strip

- Allows increase in height of 25mm
- Integrates seamlessly with K-FORM Screed Rails
- Compatible with K-FORM top strip
- Fast and easy clip on design

## K-FORM Screed Rail

### Top Strip Angle Joint

Top Strip Angle Joints integrate seamlessly with K-FORM K85 and K135 Screed Rails. They provide a clean and tidy joint detail at intersections and should be used when it is intended to leave the top strip in place after pouring.
