

Shuttering Strips

Shuttering Strips are coiled formwork units designed to install openings in structural and civil engineering.

With DSI's Shuttering Strips, openings of all sizes in base slabs and concrete floors are quickly installed. Shutter Strips are perforated crosswise every 50mm.

The length of opening is a multiplication of this size, i.e. 150 x 150, 200 x 300 etc...

The scaled profile ensures proper bond to the concrete.

Uses for Shuttering Strips

- ✓ Base Slabs
- ✓ In-situ Floor Slabs
- ✓ Precast Floor Slabs

Advantages of Shuttering Strips

- ✓ Strong bond to concrete
- ✓ Almost any size possible due to pre-punched profiling at distances of 5 cm
- ✓ Easy vertical bending
- ✓ Various shapes possible

Installation

Unroll shuttering strip and cut to length with snips or angle grinder.

Fold shuttering strip over the edge of a table at the required length and trim.

Fix the overlapping ends with tie wire or metal strips. Then place the finished opening form on the blinding or floor slab formwork and secure into position, as well as stiffening.

Shuttering Strips

Sizes & Spec

Type SF with scaled profile
1 roll = 10 m

Type	Height (mm)	Units / Pallet
SF 14	140	480 m
SF 16	160	480 m
SF 18	180	420 m
SF 20	200	420 m
SF 22	220	360 m
SF 24	240	360 m
SF 25	250	300 m
SF 26	260	300 m
SF 28	280	300 m
SF 30	300	300 m

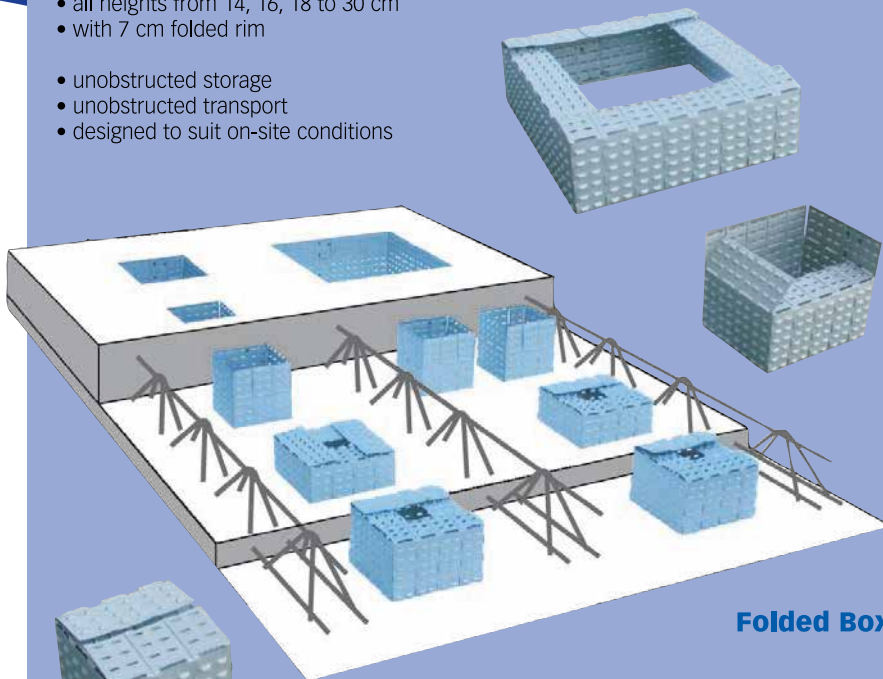

Type S with notched profile
1 roll = 10 m

Type	Height (mm)	Units / Pallet
S 14	140	480 m
S 16	160	480 m
S 18	180	420 m
S 20	200	420 m
S 22	220	360 m
S 24	240	360 m
S 25	250	300 m
S 26	260	300 m
S 28	280	300 m
S 30	300	300 m
S 32	320	300 m
S 34	340	240 m
S 36	360	240 m

Also available ready to use for precast floor slabs

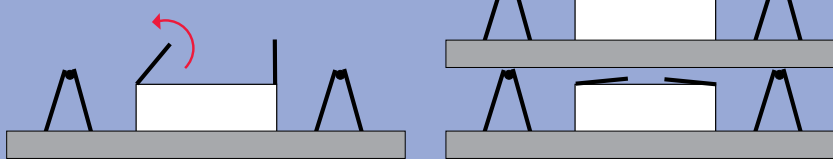

- all sizes with 5 cm partitions
- all heights from 14, 16, 18 to 30 cm
- with 7 cm folded rim
- unobstructed storage
- unobstructed transport
- designed to suit on-site conditions

Folded Box

Precast floor slabs with installed openings are stackable.

Prior to concrete pour, the sides are unfolded on site.

Qty.	Size A (cm)	Size B (cm)	Size H (cm)
