

Speed Edge Formwork

Speed Edge Formwork for the installation of permanent lateral formwork for reinforced concrete base and floor slabs in structural and civil engineering.

DSI's Speed Edge Formwork is made from galvanised sheet metal and is used for shuttering base and floor slabs. Corners are easily installed by simply cutting the base of the 2.25m long units.

Advantages of Speed Edge Formwork

- ✓ Self-supporting up to $h=50\text{cm}$
- ✓ No additional support necessary
- ✓ No stripping required
- ✓ Fast installation
- ✓ Corners are simply bent into shape
- ✓ Low transport costs
- ✓ Installation without crane

Installation

Simple lap joints with 3-4cm overlap

Fixing with standard or extra long nail

External Corner:
Cut base & bend

Fixing

The forces of the concrete weight (G) and the formwork pressure (H) are in balance. The only fixing required is nailing to prevent the formwork moving sideways.

Alternative installation

Instead of nailing, the binding layer can also be concreted on top of the edge formwork base.

Speed Edge Formwork for base slabs

Dimensions

Type	H (mm)	B (mm)	Units / Pallet
R 14	140	120	378m
R 16	160	120	315m
R 18	180	120	315m
R 20	200	155	252m
R 22	220	130	234m
R 24	240	140	189m
R 25	250	155	157.5m
R 26	260	160	148.5m
R 28	280	170	135m
R 30	300	180	135m
R 35	350	210	90m
R 40	400	240	63m
R 45	450	270	63m
