

## Movement ties

This range of ties allow masonry walls to be tied back to other structures (steelwork or masonry) providing restraint in one direction but allowing movement in the other. This is achieved by placing a debonding sleeve over the part of the tie which is to be embedded in the wall allowing the tie to move within the sleeve. These ties are also used in movement joints where they occur in long runs of brickwork. The ties span over a vertical joint preventing vertical movement but allowing horizontal expansion and contraction.

## Product

### V8PE Dovetail Plain End Tie

This product allows lateral movement between masonry and a fixed channel or slot.

(Sleeve supplied as extra)

Sizes:

75mm	200mm
100mm	225mm
125mm	250mm
150mm	275mm
175mm	300mm

## Performance

V8PE 75mm-300mm	
Shear Load Capacity	<b>1180N</b>
Minimum Mortar Joint	<b>10mm</b>
