

Solco Top Hat Units

Description:

Solco Top Hat Units are designed to form an effective seal where a pipe, duct or service penetrates a construction membranes. The top hat unit is selected to suit the membrane type being used, in order to provide continuous VOC, ground gas and/or damp proof protection.

The most common size used is for 110mm pipe, other sizes include : 55mm, 80mm, 110mm, 135mm and 160mm. All Top Hats come with suitable size jubilee clip. Bespoke sizes are available upon request.

Most top hats are 110mm diameter with a 90° upstand.

Other bespoke designs are : Conical Top Hat, 45° Top Hat, Periscope Top Hat, Square Top Hat, Multi Entry Point Top Hat.
