

Solco Waterstop Mesh

Description:

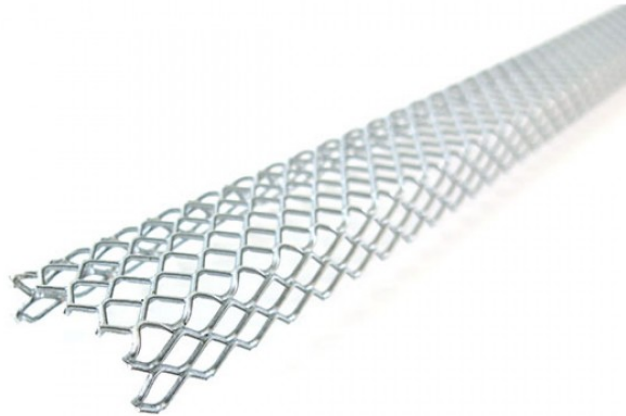

An expanded metal mesh grid made of galvanized U-shaped steel. Developed for the fixation of Solco water swellable sealing bars in concrete construction joints or reinforced concrete construction.

Uses:

Ensures good fixation of the sealing bar, especially in vertical applications. Can be nailed, doweled or tacked.

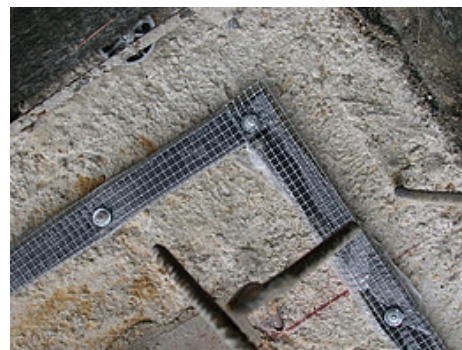

Application

Place Solco Swellable Waterbars on a smooth and dust free surface (concrete) Avoid shifting or floating of the sealing bar to be installed. Fixation of the wire mesh is performed by nailing, doweling or tacking with a recommended spacing of 25cm

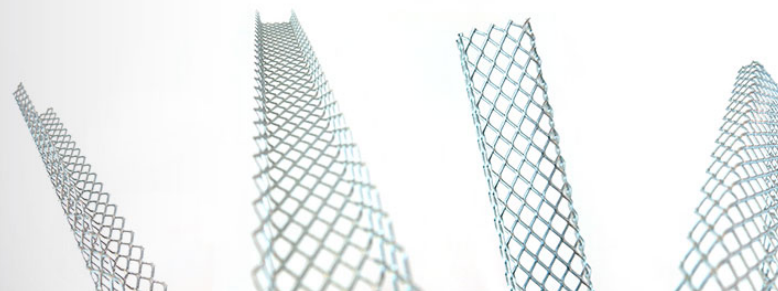

Packing

U shaped, 1mt long, 30 pieces per box.

WIRE MESH

Ultra handy for vertical sealing bar applications.
