

Solcourse TPS Sheeting

Description:

Solcourse TPS Sheeting is a high quality general purpose polythene sheet that provides temporary protection of materials, machines, and all types of surfaces during renovation and construction work.

Solcourse TPS Sheeting can also offer protection against unwanted dirt or debris spreading through a building site and can also be used to protect furniture from damage whilst in transit.

Our TPS Sheeting is an ideal product for multiple applications and construction projects. It is fast to install and reduces the risk of damage to exposed surfaces.
